Table 3: Training network configurations for different datasets

Validation-selected LightSAKT settings

Setting	ASSIST2009	ASSIST2015	Algebra 2005–2006
train_ratio	0.7	0.7	0.7
validation_ratio	0.1	0.1	0.1
test_ratio	0.2	0.2	0.2
learning_rate	0.0010	0.0005	0.0010
seq_len	100	100	200
optimizer	Adam	Adam	Adam
embedding_dimension	64	128	128
num_heads	2	4	4
dropout	0.1	0.1	0.2
batch_size	64	64	64
max_epochs	50	50	50
early_stopping_patience	5	5	5

LightSAKT configurations selected independently by validation AUC; target student-disjoint ratios are 70/10/20.
Adam: betas (0.9, 0.999), epsilon 1e−8, weight decay 0. Early stopping monitors validation AUC.
Split/grid seed 42; final training seeds: 42, 123, 2026, 3407, 7777. Test data do not select configurations.
